

## APPLICATIONS

Hydrant Isolation valves are suitable for potable and non-potable water systems installed below and above ground.

The valves are designed to provide a screw down isolation point for attached outlet devices such as air valves and hydrants.

## FEATURES

High strength ductile iron body for impact resistance

Corrosion Resistant materials and coatings

Versatile design for attaching DN 80 – 100 air valves and hydrants

## TECHNICAL DATA

Standard:	NZS 4522 (Lic OMK30048) WSAA Product Appraisal 1817 – Betta Valves PN16
Size Range:	DN 80, DN 100
Pressures:	<b>PN35</b> Operating Pressure 3500 kPa Test Pressure – Seal 3850 kPa Test Pressure – Body 5250 kPa
Temperatures:	Max 80 deg C, Max 40 deg C for potable water systems to AS 4020
Operation:	Screw down – anti-clockwise or clockwise closing
Flange drillings:	PN35 (AS 4087 Fig B6)
Inlet:	Flange with slotted drilling to suit DN80 – 100
Outlet:	Stud Bolts to suit DN 80 or DN 100 flange drilling

Air Valve Isolation

Spring Hydrant Isolation
